

BEVERAGE FOUNTAIN

Item # 1610

845.226.2447

OPERATION INSTRUCTIONS

Set on sturdy level surface. Pour approximately two quarts of pre-chilled beverage into lower reservoir. Turn switch to ON. Beverage should circulate within a minute. If beverage does not flow, retry after 10 seconds. You will hear the pump running. Add more pre-chilled beverage to fill approximately full. Hanging beads may need jiggled to allow the flow of liquid through the small holes. Pre-cool beverage thoroughly to 36 degrees, before adding to fountain.
