

GAS GRILL

Item # 1450

845.226.2447

INSTRUCTIONS:

Make sure lava rocks inside of the grill are dispersed evenly for even heat. Attach propane to the grill via the propane hose. Slowly open the valve on the propane tank to avoid triggering the safety device. Once propane is flowing, turn the lever for the side farthest from the propane tank and ignite the flame with a long bbq lighter. Once that side is lit you should be able to turn the rest of the levers to light the rest of the grill.

POWER REQUIREMENTS:

Propane

SPACE REQUIREMENTS:

5' L, 4' H, 2.5' W

OPTIONAL EQUIPMENT:

OTHER REQUIREMENTS:

40 lb propane tank

Scrape grill's surface with standard barbecue brush to get any excess food off
